Program Completion Rate

Program Completion Rate is the calculation of the percentage of students who enter a program of study and complete the program of study in the advertised program length (i.e., on-time). Calculation of the program completion rate begins with a student's enrollment in the first nursing course and at the time when a student can no longer receive a 100% tuition refund for the first nursing course regardless of the source of funds used to pay the students' tuition. The calculation of the program completion rate is: $\text{Graduates} \div \text{Beginning Enrolled (including Withdrawal students, less Cancellation students)}$

Program Completion Rate* (Cohort 5)	Graduated	Beginning Enrollment	Completion Rate
